

New Vision

Court Case Management Solutions

The NewVision Court Case Management System for Civil and Criminal Court applications automates the case initiation, docketing/indexing, imaging, storage and retrieval of court documents.

Complete Support of Civil and Criminal Court Systems...

NewVision System's revolutionary Court Case Management System for Civil and Criminal Courts combines all data and document images in a totally integrated digitized case file. The digital file - complete, accurate and easy to manage - enables clerks, judges and the public to quickly access documents via workstations at the courthouse or through the Internet or Intranet, dramatically enhancing productivity. The user-friendly system provides multiple levels of security and access rights to ensure that privacy rules are enforced.

What used to take weeks or months can now be done in a matter of minutes by the NewVision Court Case Management System.

- Document imaging ensures that judges, attorneys, clerks and the public have quick and simultaneous access to complete case filings - especially important for cases that take years to wind through the court - from initiation through final judgment and, if necessary, appeals.
- Digitized documents enable judges and attorneys to review documents, file motions and take other actions via the Internet or Intranet, speeding up all aspects of a case.
- Judges have all case material on their workstations - calendars, dockets, and court documents - integrated, complete and up to date. The entire case is at the judges' fingertips.
- Electronic documents created online by a deputy clerk, filed by a judge from chambers or sent by an attorney via the Internet significantly enhancing productivity. The clerk's staff can handle more cases in less time without having to enter, time-stamp and scan paper documents.

- The electronic recording link to the Official Records System automates the recording of final judgments, eliminating a significant workload in recording paper documents and making judgments available immediately.
- The system automatically prepares all appeals documents, including the index and documents such as the Clerk's Affidavit, while tallying pages, computing charges and stamping page numbers and seals onto documents.
- Fees are assessed automatically, and payments are grouped and categorized for generating required reports, resulting in much greater efficiency.
- Documents can be emailed to appropriate parties, rapidly linking, for example, a court with a sheriff's department.

NewVision System's Court Case Management System cuts costs and automates your workflow to provide greater productivity.

Other NewVision Solutions include ...

- Official Records
- eRecording
- Passports
- License Processing Solutions
- Tax Deeds System
- Disaster Recovery
- Web Hosting
- Custom Applications
